Syed Mozamil Shah

AI Engineer & Full-Stack Developer
+92-3035149415 | syedmozamilshah99@gmail.com | Linkedin | Portfolio

Summary

Computer Science Student with deep expertise in AI/ML systems and full-stack development. Specialized in designing intelligent applications using LangGraph, RAG architectures, and modern web technologies. Proven ability to deliver scalable solutions that drive business impact—from AI-powered recruitment platforms to therapeutic mobile applications. Strong technical foundation combined with leadership experience in emerging technologies.

Education

Bachelor of Science in Computer Science, Air University Islamabad *Sep 2022-Sep 2026*
Courses: PF, OOP, Data Structures, Design and Analysis of Algorithms, Web Development, Mobile Computing

Skills

Programming Languages: Python | JavaScript | Dart | C++
Frameworks & Libraries: React | Node.js | Express | Flutter | LangChain | LangGraph | RAG
Databases: MongoDB | Firebase Firestore | Oracle
Tools & Technologies: REST APIs | Web Scraping | Git & Github | Agile Methodologies

Projects

HireIQ – AI-Powered Resume and Job Matching Platform | Github
React | LangGraph | MongoDB | REST API | Web Scraping

- Built intelligent ATS scoring system analyzing resumes against job descriptions with 75%+ accuracy threshold.
- Created automated skill gap analysis and personalized career roadmap generation with missing keyword indicator.
- Designed bulk resume processing system for recruiters to find best resumes against the job description.

QalbCare – Islamic Emotional Therapy Mobile App | Github
Flutter | LangGraph | Gemini API

- Launched AI-powered therapeutic mobile application integrating Islamic guidance with modern CBT techniques.
- Developed daily Muhasiba module for spiritual assessment and a 7-Day Healing Journey (QalbState).
- Enhanced user engagement through mood based-LLM-based therapeutic responses.

Doctra – AI-Based Prescription Support System | Github
LangGraph | RAG | React | Custom Inference Engine

- Engineered AI assistant for medical professionals with interactive prescription generation improving workflow efficiency by 30%
- Built custom inference engine processing structured medicine and symptom database.
- Integrated follow-up questioning system for comprehensive patient assessment

Job Khoji – Job Portal with AI Skill Matching | Github
MERN Stack | LangGraph | Web Scraping

- Built a full-stack job portal with recruiter dashboards for job posting, editing, and management.
- Integrated real-time job scraping with manual listings, improving job listing relevancy by 80%.
- Enabled automatic skill-matching using resume parsing and LangGraph-based logic to boost job recommendation accuracy.

Certifications

Flutter Mobile App Development | AUCIS *May 2024*
UI Design Principles, Stateless & Stateful widgets, Firebase, Sqflite

Digital Marketing & SEO | International Center for Excellence *Sep 2022*
Facebook Ads, Google Ads, Blogger, Guest Posting, Keyword Research, Sales Funnel

Python for Data Science, AI & Development| Coursera *Jan 2025*
Functions, Classes and Objects, Exception Handling, File Handling, Pandas, Numpy

Leadership & Achievements

Agentic AI & RAG | AUCIS *Aug 2024*
Led a 4-week hands-on mentorship program, training 20+ developers in LangGraph, Gemini API integration, And Retrieval-Augmented Generation (RAG) architectures through live workshops and project-based learning.

2nd Place Winner - PenCode Coding Competition | PenCode *May 2025*
Developed complete MERN Stack application using pen and paper in under 2 hours
